# CAUTIONARY STATEMENT

Forward-Looking Statements: This Presentation contains “forward-looking information” within the meaning of Canadian securities legislation and “forward-looking statements” within the meaning of the United States Private Securities Litigation Reform Act of 1995 (collectively, “forward-looking statements”). These forward-looking statements are made as of the date of this document and West does not intend, and does not assume any obligation, to update these forward-looking statements, except as required under applicable securities legislation. Certain statements contained in this presentation may constitute forward-looking statements. These statements relate to future events or the future performance of West. All statements, other than statements of historical fact, may be forward-looking statements. Forward-looking statements are often, but not always, identified by the use of words such as “seek”, “anticipate”, “plan”, “continue”, “estimate”, “expect”, “may”, “will”, “project”, “predict”, “propose”, “potential”, “targeting”, “intend”, “could”, “might”, “should”, “believe” and similar expressions. These statements involve known and unknown risks, uncertainties and other factors that may cause actual results or events to differ materially from those anticipated in such forward-looking statements. West believes that the expectations reflected in those forward-looking statements are reasonable but no assurance can be given that these expectations will prove to be correct and such forward-looking statements included on this website should not be unduly relied upon by investors as actual results may vary. West will not necessarily update this information unless it is required to by securities laws and the forward-looking statements contained in this website are expressly qualified in their entirety by this cautionary statement. This website also discloses mineral resources. Mineral resources that are not mineral reserves do not have demonstrated economic viability. In particular, this website contains forward-looking statements, pertaining to the following:

- Capital expenditure programs; development of deposits and resources; treatment under regulatory regimes; expectations regarding West’s ability to raise capital; work plans to be conducted by West, and the production of gold and copper from West’s mineral projects; With respect to forward-looking statements listed above and contained in this presentation, West has made assumptions regarding, among other things:
- the legislative and regulatory environment; the impact of increasing competition; current technological trends; unpredictable changes to the market prices for gold and copper; anticipated results of exploration and development activities; and that costs related to development of the gold and copper properties and the development of gold and copper production projects will remain consistent with historical experiences; and
- West’s ability to obtain additional financing on satisfactory terms. West’s actual results could differ materially from those anticipated in these forward-looking statements as a result of the risk factors set forth below:
- uncertainties regarding the regulatory regime and the application approval process; volatility in the market prices for gold and copper; uncertainties associated with estimating and developing resources; geological, technical, construction and processing problems; liabilities and risks, including environmental liabilities and risks, inherent in developing gold and copper projects; fluctuations in currency and interest rates; competition for, among other things, capital, acquisitions of mineral projects, undeveloped lands and skilled personnel; and unpredictable weather conditions.

# ABOUT WEST MINING CORP.

**WEST MINING CORP.** (“WEST”) is a mineral exploration company focused on acquiring and exploring advanced and prospective early-stage projects.

- The Company’s flagship property is the 100% owned, **Kena Gold-Copper Project** in South Eastern British Columbia. It has a current resource estimate of 2.77 million ounces of gold in the inferred category as well as over 0.56 million ounces of gold in the indicated category.\*
- The Company also has the **Spanish Mountain West** and **Junker Gold Projects** located in northern British Columbia.
- Most recently, the company executed an LOI to acquire the **Blue Cove Property** in Newfoundland.

\*Bird, May 3, 2021: NI 43-101 “Resource Estimate for the Kena and Daylight Properties

# KENA PROJECT

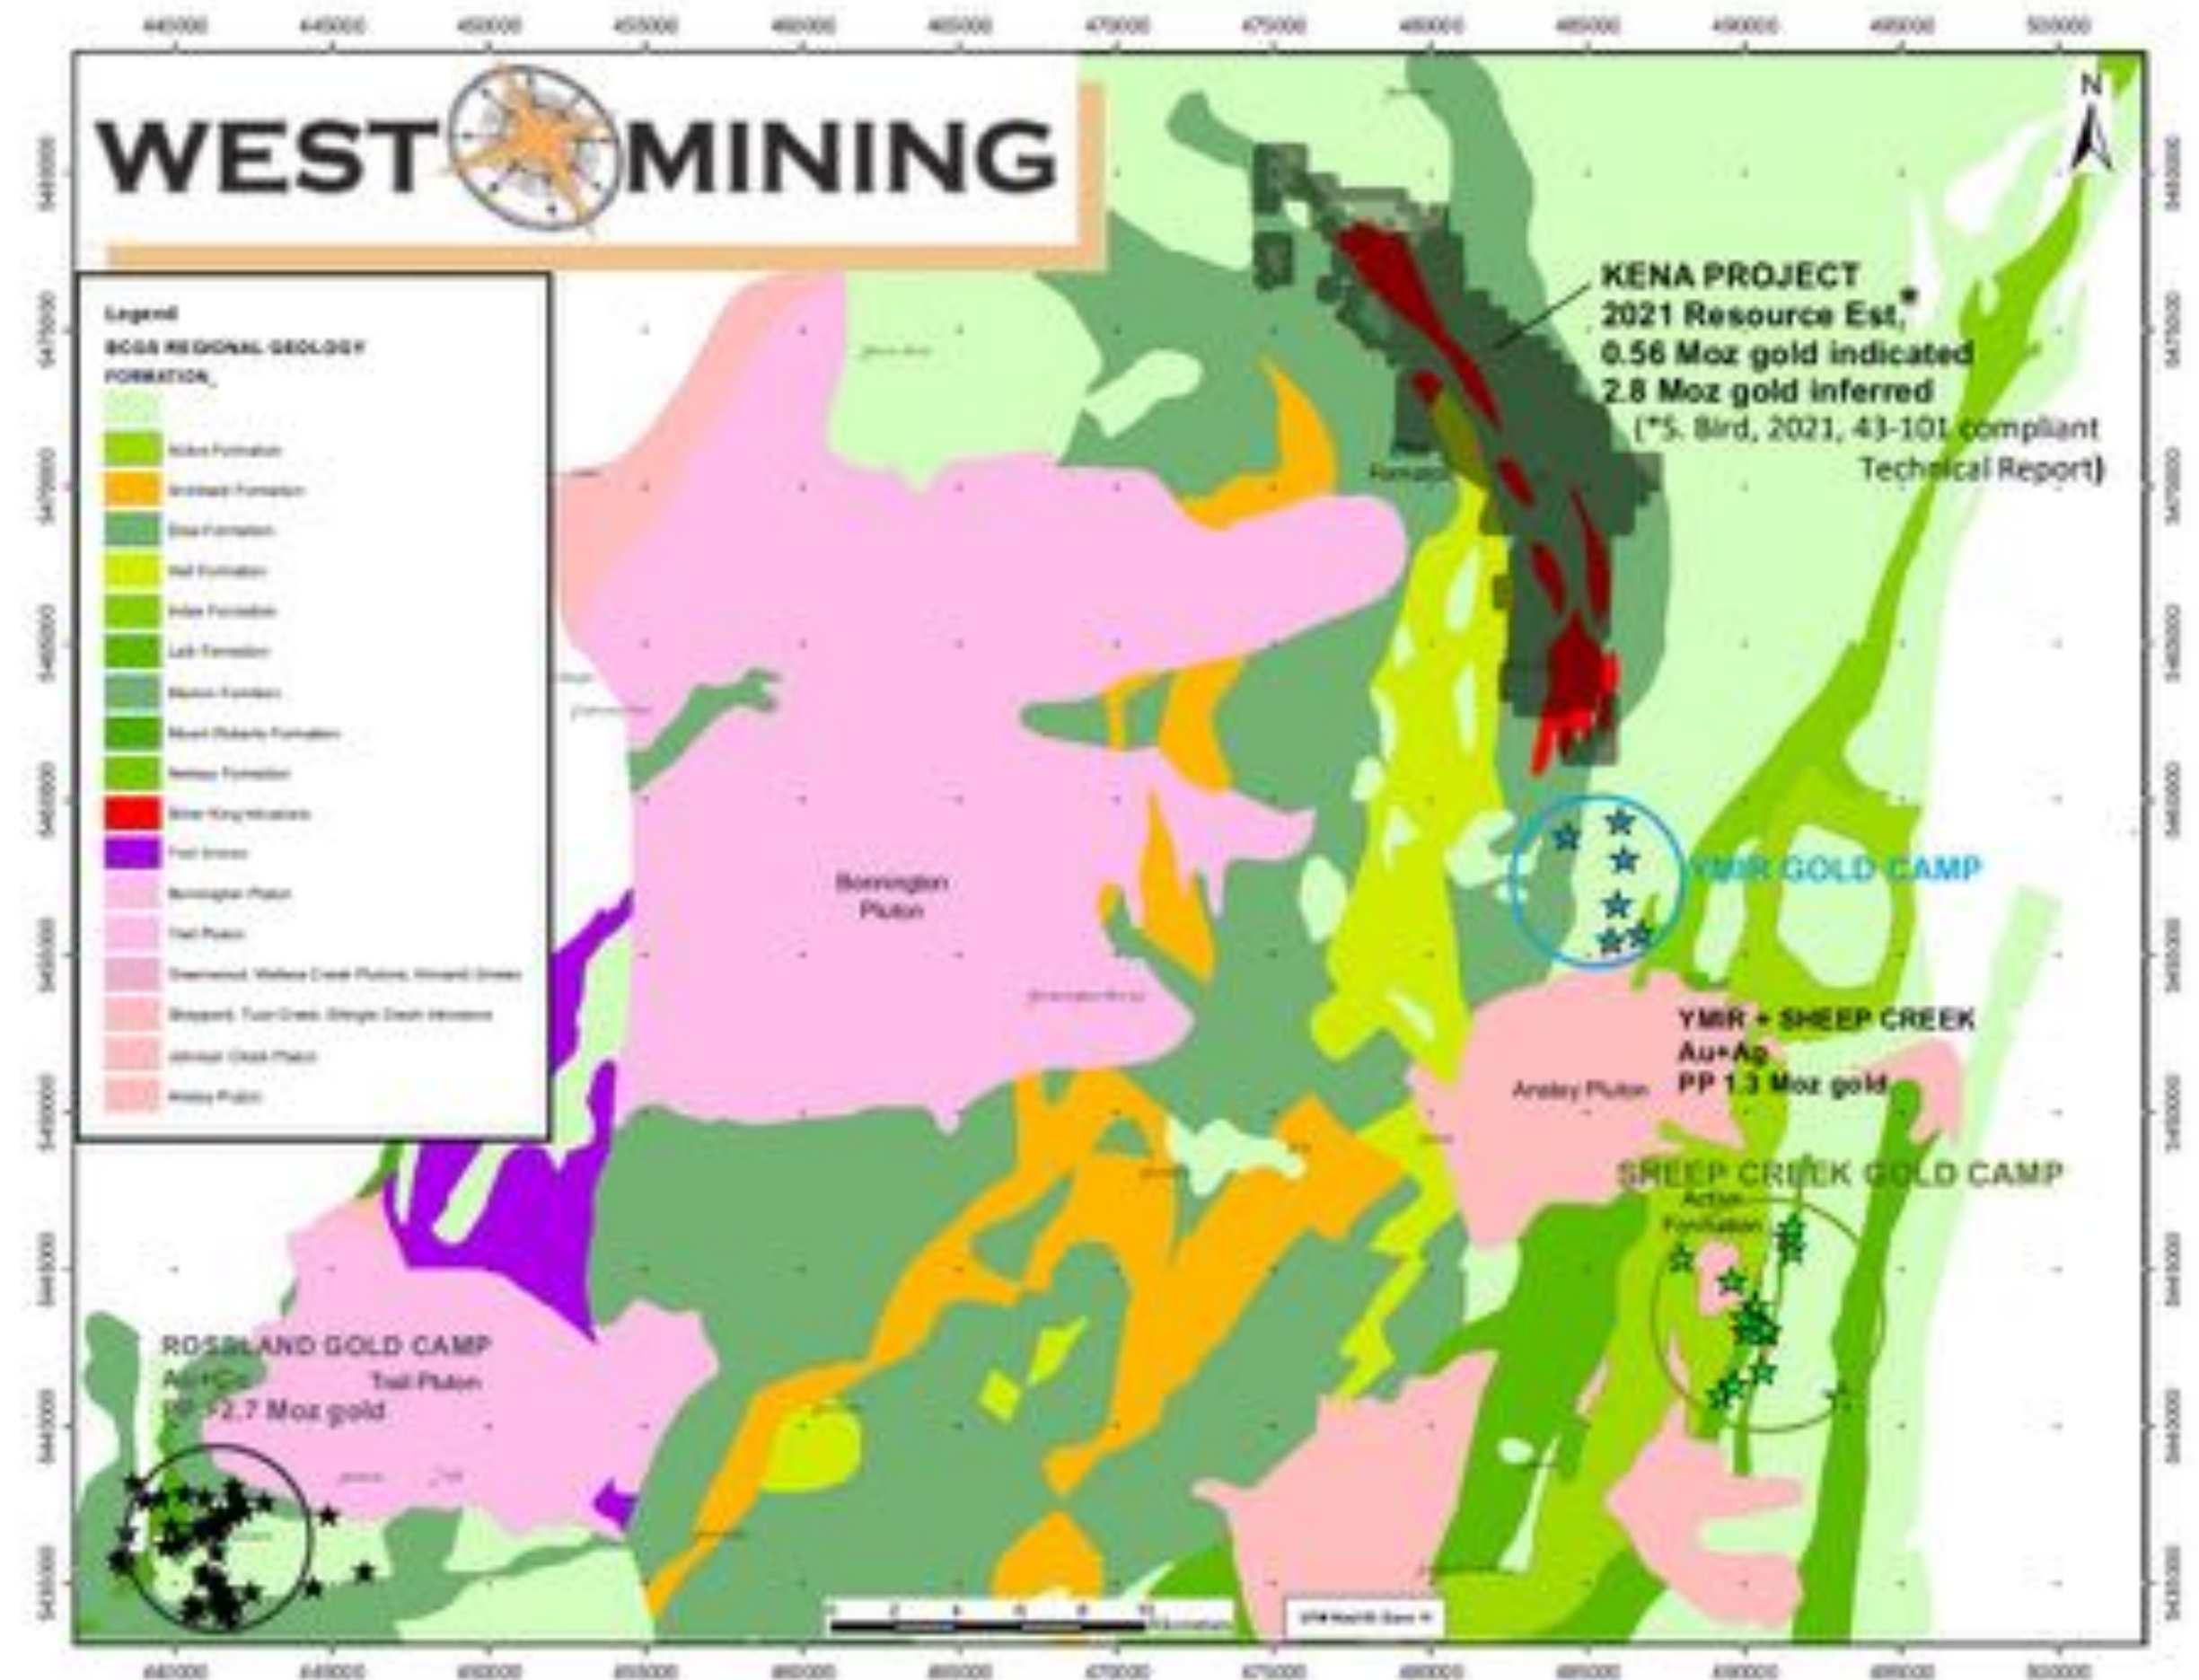

## 2021 PROJECT HIGHLIGHTS

- New Gold Resource Estimation Completed
- DIAMOND DRILLING
  - 8 Holes At Great Western Zone – Expands Gold Resource
  - 6 Holes At Starlight Trend With Discovery Of New Copper Porphyry Zone And Gold In Starlight Vein
  - 7 Holes On Large Kena Copper Zone (Assays Pending)
  - 2 Metallurgical Test Holes In The Gold Resource Area
- MAPPING AND PROSPECTING (assays pending)
  - Southern Extension – Including Historic Euphrates And Gold Cup
  - Athabasca Mine Area
  - Princess Zone
  - California-union-good Enough Trend
  - Expansion Around Kena Copper Zone
  - Airborne Magnetics Over Southern Extension

# THE KENA PROJECT “GOLDEN ARC”

- > Located in southeastern British Columbia’s historic “Golden Arc”
- > Multiple historic small scale past producing gold mines
- > Several large gold and copper geochemical anomalies
- > Strong geophysical trends coincident with the gold and copper zones
- > Potential for additional discoveries and expansion of the known zones

# THE KENA PROJECT HOSTS THREE CONTIGUOUS PROPERTIES: KENA, DAYLIGHT AND ATHABASCA

- > Excellent infrastructure
  - Paved highway and powerline running through property
  - Nearby rail and gas lines
  - Numerous hydro-electric dams within 40 kilometres
  - Good local service and supply centres
  - Local work force
  - 65 kilometres by paved highway to Teck's Trail smelter
  - Logging roads and cutblocks throughout the property
  
- > In a geopolitically stable and amenable mining jurisdiction, southeastern British Columbia, Canada

# KENA PROJECT OVERVIEW

- > Over 9000 hectares consisting of the Kena, Daylight and Athabasca Properties which trend for more than 20 kilometres along a favourable mineralized belt
- > Prior to 2021, there were 39,819.19 metres of diamond drilling in 252 holes
- > The Kena Project area has produced over 100 intersections in drill core, that are greater than 5.0 g/t Au, over greater than 2.0 m intervals.
- > Gold values from historical drill intercepts range from trace to 240.07 g/t Au over 1.23m and 172.10 g/t Au over 2m
- > Large underexplored copper and gold porphyry targets on southern end of the property
- > Several historic workings and small scale past producing gold-silver-copper showings

# KENA PROJECT

## CURRENT RESOURCE ESTIMATE

- > 2,773,100 ounces of gold in the inferred category
- > 561,900 ounces of gold in the indicated category
- > Effective date May 3,2021
- > Completed by Independent Qualified Person Sue Bird, P.Eng., of Moose Mountain Technical Services

### 43-101 Report – Resource Estimate for Kena and Daylight Properties

**Table 1-1 Kena Mineral Resource Estimate – Total Project**

Class	Cut-off Au (gpt)	Tonnage (ktonnes)	Au (gpt)	NSR (CDN\$)	Au Metal (Koz)
Indicated	0.1	44,006	0.449	34.51	635

	0.5	53,060	0.813	61.33	1,386.7
	1	9,136	1.588	115.44	466.4

**Notes for Table 1-1:**

- Resources are reported using the 2014 CIM Definition Standards and were estimated using the 2019 CIM Best Practices Guidelines.
- Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability.
- The Mineral Resource has been confined by a "reasonable prospects of eventual economic extraction" pit using the following assumptions: US \$2,000/oz. Au at a currency exchange rate of 0.77 US\$ per \$CDN; 99.95% payable Au, 96.5% payable Cu; \$4.30/oz Au offsite costs (refining, transport and insurance), 0.467 Cu offsite; a 3% NSR royalty; and uses a 88% metallurgical recovery for gold for all areas and 85% recovery for Cu in the Cu zone only.
- Pit slope angles are assumed at 45°.
- The specific gravity of the deposit has been assigned as 2.8 based on sg measurements in the Kena deposit
- Numbers may not add due to rounding.

Table 1-1 summarizes the Total Mineral Resource Estimate for the Kena Project with the base cut-off grade within the "reasonable prospects of eventual economic extraction" constraining pit of 0.25 g/t gold as highlighted.

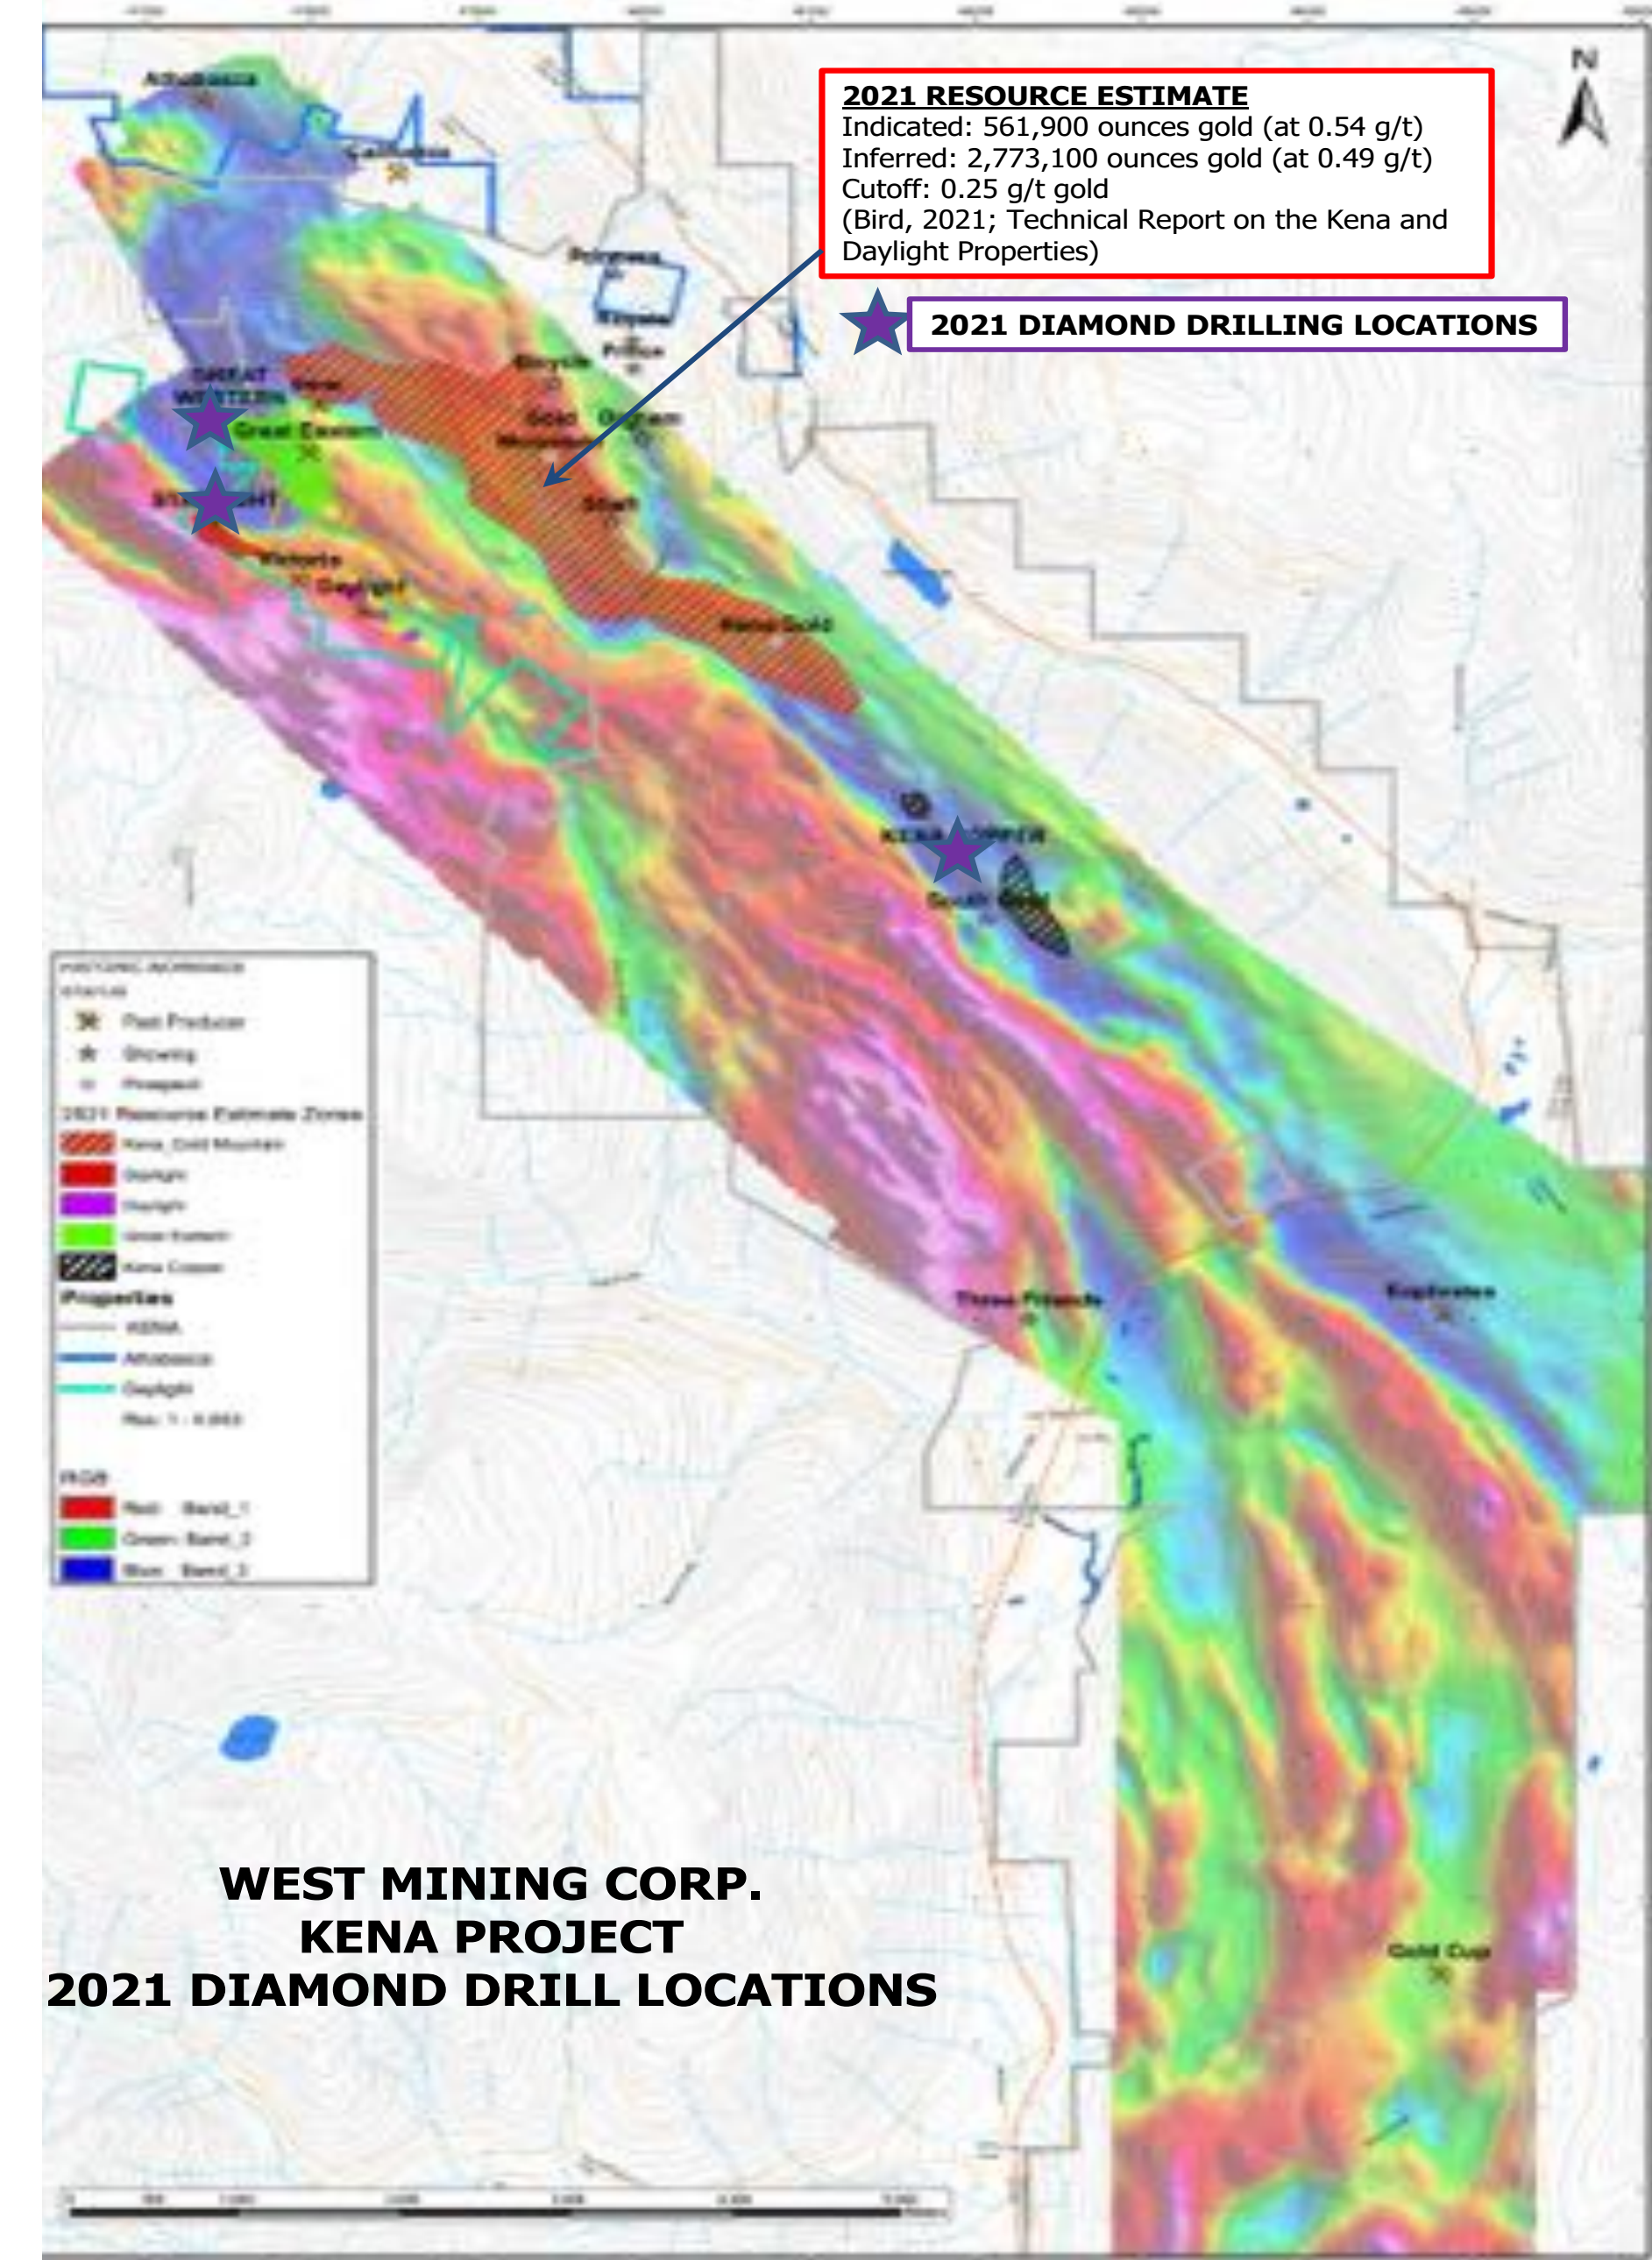

# KENA PROJECT

## KENA COPPER ZONE EXPLORATION

The Kena Copper Zone is defined by a 2500 x 450 metre copper soil geochemical anomaly coincident with a strong induced polarization chargeability high. Nine broad spaced historic drill holes have been put in over the Kena Copper Zone between 1981 and 2010. In 2021, seven holes have been drilled across the central core of the Kena Copper Zone (assays pending).

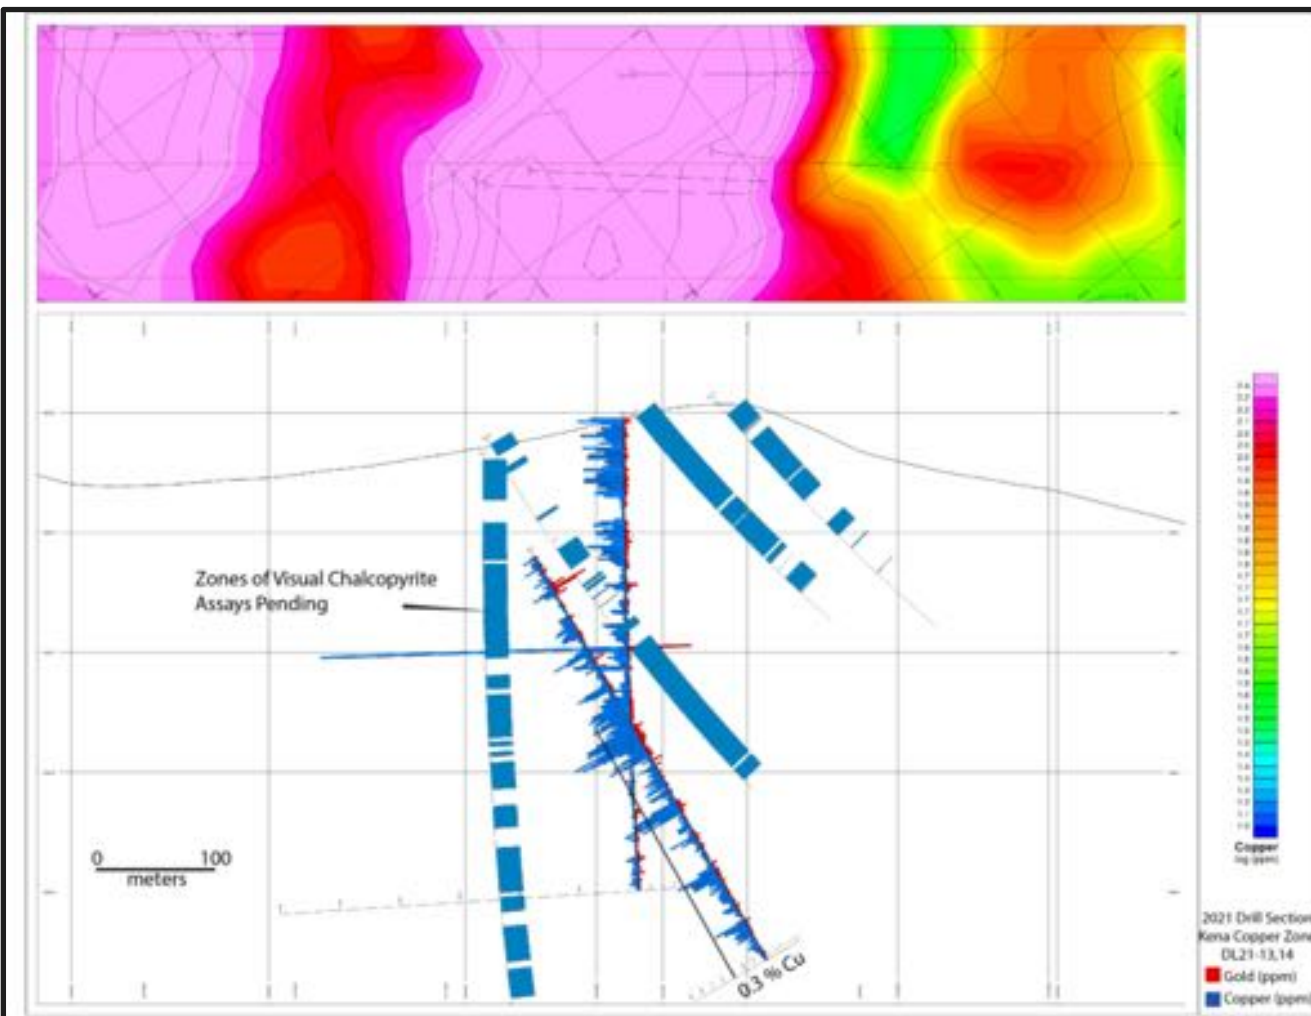

Chalcopyrite mineralization and significant alteration signatures are present in all of the 2021 drill holes.

# BLUE COVE

## NEW PROPERTY WITH MULTIPLE COPPER SHOWINGS

The Blue Cove Copper Property is located at the head of Fortune Bay, in southeast Newfoundland and is host to significant copper occurrences in outcrop. Several new targets have been identified by prospecting over the past two years and copper mineralization can be found locally throughout the claims. The best assay obtained to date from grab samples at the Blue Cove Property returned values as high as 5.1% Cu, 33 g/t Ag and 0.27 g/t Au. Copper mineralization generally occurs in altered volcanic rocks and sediments on the Property with the primary copper minerals being chalcocite with more minor bornite and chalcopyrite. Widespread copper oxide is readily visible on many outcrops throughout the property.

The Property consists of 232 claims covering a 5,800 hectare area, striking 22 kilometres adjacent to the Terrenceville fault structure. Excellent infrastructure also exists in the area, including the nearby town of Terrenceville which hosts a deep sea port.

Property consists of 232 claims covering a 5,800 hectare area

# BLUE COVE

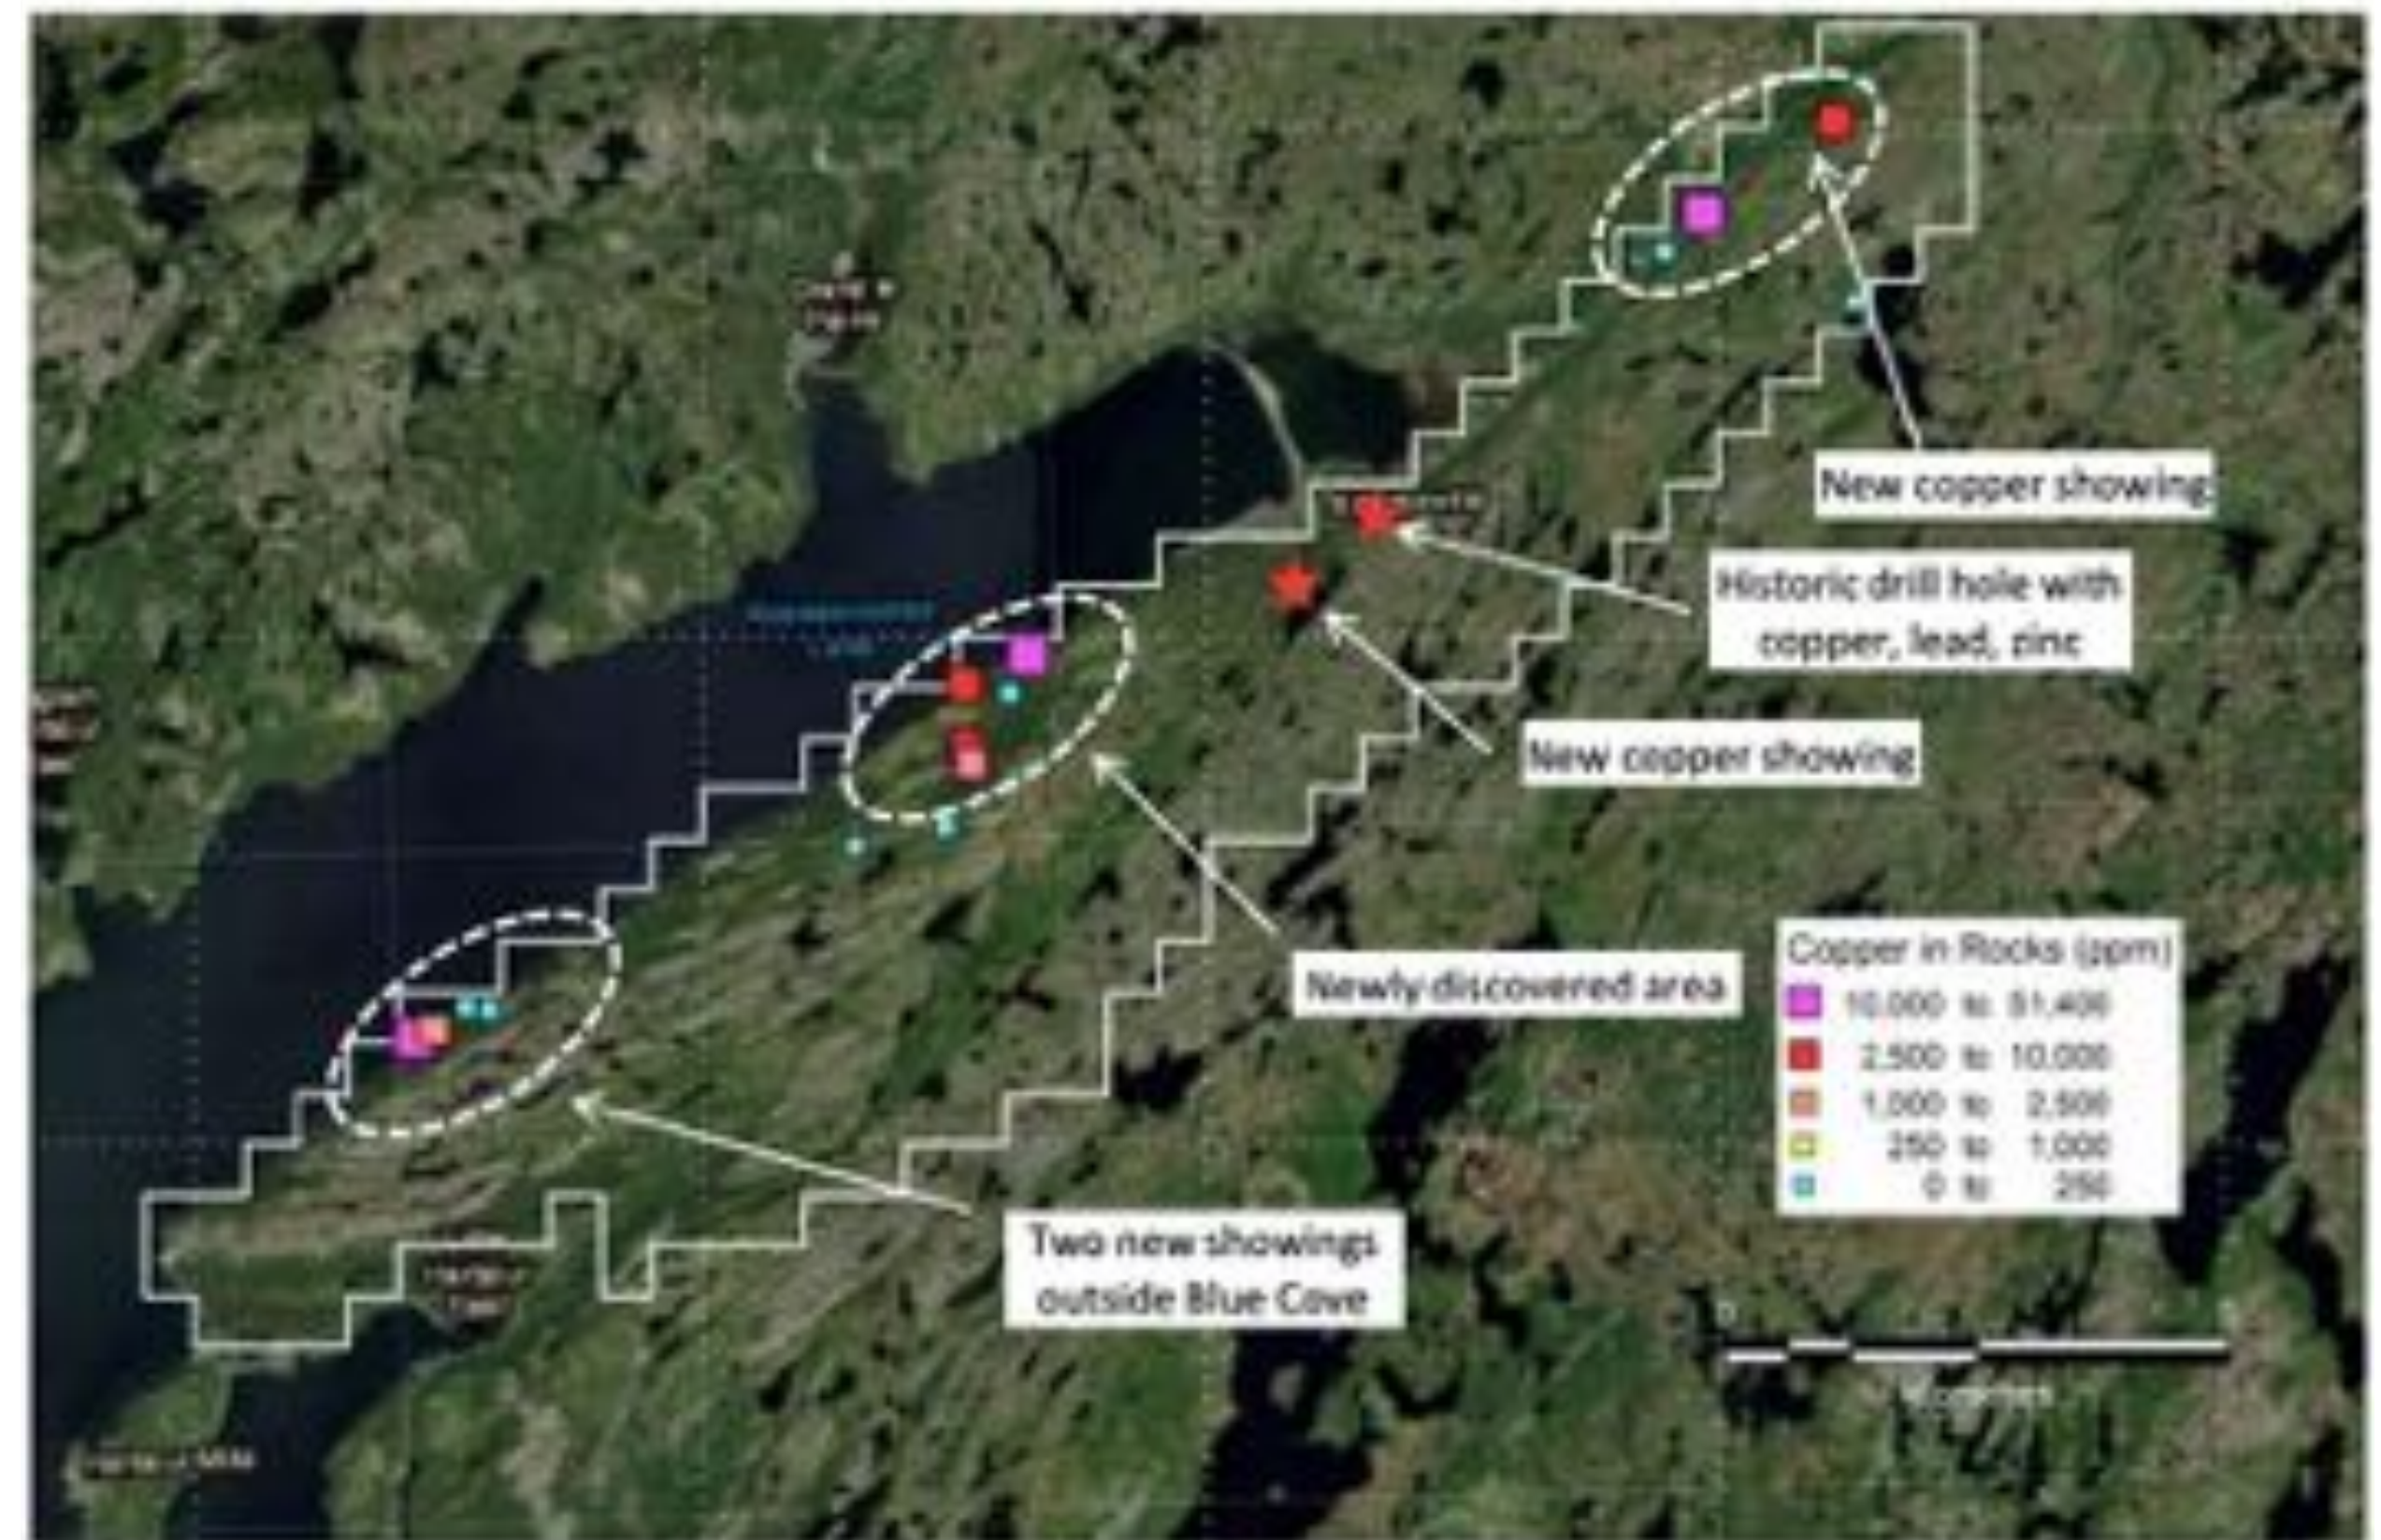

## HISTORICAL WORK TO DATE

### 1998 to 2004

Two local prospectors from the nearby town performed cursory exploration in the area which eventually resulted in a small back pack drill program just behind the community of Terrenceville. The Blue Cover showing was not tested. • Despite two very shallow holes (60m) and serious drilling issues with a backpack drill, Cu/Pb/Zn was intersected in drill core which included 0.48% Cu, 2.0% Pb and 1.0% Zn over a narrow 5 ft interval. The assays show good potassic alteration which is important indicator of alteration needed for deposits. The metal content is indicative of a hydrothermal system depositing metals.

### 2018 to Present

Limited prospecting efforts by the current claims holder have led to the discovery of numerous new copper showings with the vast majority of the Property remaining completely unexplored.

Most of the Property showings have been discovered with limited effort in the last 18 months.

# BLUE COVE IN SUMMARY

- The Property shows significant potential.
- Wide open for exploration.
- Property consists of 232 claims (5800 hectares)
- Excellent location. Good access to the Property with local infrastructure nearby making this a low cost property to explore.
- Newfoundland is a very mining friendly political jurisdiction.
- Excellent government incentives are in place for qualifying companies.
- Turnkey field operations are in discussion.

Blue Cove Cu: 2.15%, 1.5%, 0.9%, 0.7% In chalcopyrite, chalcocite, bornite, malachite and azurite

# MANAGEMENT TEAM

## **NICHOLAS HOUGHTON**

CEO, President, Director

Nicholas Houghton has worked several years in the private and public capital markets sector. Mr. Houghton has extensive experience in recognizing, delineating and financing business opportunities either through funding or mergers and acquisitions. Mr. Houghton has served on several company boards as director and Chairman, as well as serving in the capacity as Vice President, President and CEO. Mr. Houghton was CEO and President of True North Gems (TSX-V: TGX) and during his tenure took the company from exploration to a fully permitted mine in Greenland. He was instrumental in early stage funding for Next Leaf Solutions (CSE: OILS) and was also a founding director and board member of Less Mess Solutions (TSX-V: LMS), which was successfully bought and taken private by a UK entity based out of London.

## **ABBEY ABDIYE**

CFO

Mr. Abdiye has extensive experience in the financial sector in both public and private companies. He is a Chartered Professional Accountant (CPA), and CFO of other reporting issuers, where he was responsible for all financial, fiscal management, regulatory compliance matters and reporting aspects of company operations. He also provided strategic guidance and direction in capital structuring and engaged in innovative financing programs that leveraged sales and development.

At West Mining, Mr. Abdiye provides leadership and coordination in the administrative, business planning, reporting, and budgeting efforts of the company. He oversees the company's financial reporting, internal controls, corporate governance management systems, annual audit and regulatory compliance matters. He obtained a Bachelor of Business Administration degree from Simon Fraser University and a Co-op Education certificate.

# MANAGEMENT TEAM

## **LUKE MONTAINE** Corporate Development

Luke Montaine has been involved in the capital markets for over 15 years in various capacities including the roles of investment advisor, corporate development, corporate finance and has organized fund raising for many venture capital and private equity situations. After studying economics at the University of British Columbia, Mr. Montaine began his career as an investment advisor at Global Securities Corporation, a boutique securities and futures brokerage firm in Vancouver, British Columbia prior to being acquired by PI Financial Corp. Mr. Montaine has had extensive experience in structuring, financing and sourcing assets for various public and private companies. Mr. Montaine currently serves as CEO and director of Ord Mountain Resources Corp. (TSX-V-NEX: OMR.H). Mr. Montaine has been instrumental in West Mining's identification of the Kena Project opportunity, raising of capital and the selection of senior management and technical teams to advance its projects.

## **ALEX KLENMAN** Director

Mr. Klenman is an experienced junior mining executive whose career spans over 30 years in the private and public sectors. Over the past decade he has held and continues to hold leadership roles with several publicly traded resource companies, including senior officer and/or director positions with Nexus Gold Corp, Leocor Gold, Azincourt Energy, Manning Ventures, Tisdale Resources, and Arbor Metals. During his career as a marketing, communications, and finance consultant he has worked with companies such as Roxgold Inc, Forum Uranium, Integra Gold, Midnight Sun Mining, and others. He began his professional career in television broadcasting which evolved in the late 1990's into communications, finance and marketing roles principally for publicly traded companies.

## **ANDREW LEE SMITH** Director

Andrew is a Professional Geologist who has over 30 years of experience successfully exploring, developing, and operating African and North American base and precious metals mining projects. He holds an Honours BSc in Earth Sciences from the University of Waterloo and is a member of the Association of Professional Engineers and Geoscientists of British Columbia. Andrew received the Mining Entrepreneur of the Year Award in 1994 from the Quebec Prospectors Association for his role in the development of the Beaufor and Sleeoing Giant mines and was named Outstanding Alumnus of 2009 by the Science Faculty of the University of Waterloo for his contributions to mineral exploration. He is also the CEO and President of East Africa Metals.

# ADVISORY BOARD

## **JOHN MIRKO** Geological Consultant

Mr. Mirko has 47 years' experience in the mining industry and is currently the founder & President of Canam Mining Corporation, President & CEO of Rokmaster Resources Corp. and the former President and founder of Canam Alpine Resources Ltd. (sold to Vizsla Resources Ltd. in September 2019) and a founder of Pacific Rim Mining Corp., Frontier Pacific Mining Corp., Roca Mines Inc., Stikine Gold Corp. He has consulted and prospected internationally since 1972. He has successful experience in discovery, permitting, construction and mine operation. In 2008 Mr. Mirko was a recipient of the "E. A. Scholtz Medal for Excellence in Mine Development" from the Association for Mineral Exploration of British Columbia and in 2009, the Mining Association of British Columbia's "Mining and Sustainability Award" for the MAX Mine. He is a member in good standing of the Society of Economic Geologists, Inc., the Canadian Institute of Mining, Metallurgy and Petroleum and the Prospectors and Developers Association of Canada.

## **LAURENCE ROULSTON** Strategic Advisor

Lawrence Roulston is a mining professional with 40 years of diverse hands-on experience. He heads WestBay Capital Advisors, providing business advisory and capital markets expertise to the junior and mid-tier sectors of the mining industry. Mr. Roulston is a director or advisor to several exploration companies and is non-executive chairman of Metalla Royalty and Streaming Ltd. (NYSE: MTA and TSX-V: MTA), a public company built to generate leveraged precious metal exposure by acquiring royalties and streams.
